PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building responsive and user-focused web applications. Experienced in translating design requirements into functional interfaces, collaborating on product development, and delivering scalable frontend solutions. Proficient in React, JavaScript, Redux, and Tailwind CSS, with a strong focus on reusable components, clean code, performance, and seamless user experiences.

TECHNICAL SKILLS

HTML5, CSS3, JavaScript, React, Redux Toolkit, Tailwind CSS, Bootstrap, Responsive Web Design, Git, GitHub, Vite, Axios

PROFESSIONAL EXPERIENCE

Frontend Developer | BuildUp | October 2026

- Developed a responsive food ordering interface
- Developed responsive frontend components using React and modern styling tools.
- Improved usability across devices by building reusable UI patterns and responsive layouts.
- Used Git and GitHub for version control, collaboration, and code management.

Frontend Developer | ChopRight | May 2026 - April 2026

- Built the frontend for a food ordering web application using React, Vite, Redux Toolkit, and Tailwind CSS.
- Implemented core flows including authentication, meal browsing, cart, checkout, payment, order history, and dashboard views.
- Integrated REST APIs for authentication, orders, subscriptions, and payment verification using Axios.
- Developed reusable components and state-driven UI to support a smooth experience across mobile and desktop.
